KOMFORT SKY TUBES SYSTEMS

KOMFORT SKY TUBES SYSTEMS

How Much Light?

A 10-inch tube, the smallest option, is the equivalent of three 100-watt bulbs, enough to illuminate up to 200 square feet of floor area; 14-inch tubes can brighten as much as 300 square feet.

Popular locations for a light tube include any areas where constant indirect light is handy:

- ◆ Hallways
- ◆ Walk-in closets
- ◆ Bathrooms
- ◆ Stairways
- ◆ Kitchens
- ◆ Laundry rooms

KOMFORT LEADED STAINED GLASS (SKYLIGHTS & WINDOWS)

KOMFORT SYSTEMS COMPANY specializes in design & fabrication of leaded stained glass used for varieties of applications

- ◆ SKYLIGHTS
- ◆ WINDOWS
- ◆ CEILING
- ◆ SCREENS

Leaded stained glass skylights can be realized with support frame work either in steel or aluminum.

- ◆ When supported on steel frames, normally they are protected with external independent waterproof translation covers.
- ◆ When supported on aluminum frames, water tightness and thermal insulations is achieved by using special profiles.
